PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience in backend development, system integrations, and application modernization. Experienced in architectural decisions, RESTful APIs, microservices, and software quality, with a strong background in GNU/Linux, server administration, infrastructure automation, CI/CD, and performance optimization. Implemented AI Engineering and Context Engineering practices adopted across multiple teams.

TECHNICAL SKILLS

Programming Languages: PHP, JavaScript, TypeScript, Python.
Backend and Integration: Laravel, Laravel Octane, Symfony, Node.js, RESTful APIs, microservices.
Databases: PostgreSQL, MySQL, SQL Server, Redis, MongoDB.
Systems and Infrastructure: GNU/Linux, server administration, troubleshooting, performance optimization, Docker, Kubernetes.
DevOps and Observability: Git, GitLab CI, GitHub Actions, CI/CD, Prometheus, Grafana, Datadog.
Software Quality: PHPUnit, Pest PHP, Jest, automated testing, SonarQube.
Frontend: Vue.js, React, Quasar Framework.
AI Engineering: Context Engineering, AI-assisted development, and engineering workflow automation.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

PRODEB — Bahia State Data Processing Company, Salvador, Brazil — On-site Jun 2026 – Present

- Designed and rolled out an AI Engineering and Context Engineering framework adopted across multiple teams, improving AI-assisted development workflows and helping keep the roadmap approximately two months ahead of schedule.
- Contribute to architectural decisions and the ongoing development of SIIC v2 (SECULT-BA), applying modular design and Clean Architecture to support maintainability and reliability.
- Maintain over 90% automated test coverage through code reviews, continuous validation, and CI/CD pipeline maintenance.
- Drive backend development, infrastructure automation, and observability initiatives using Docker and Kubernetes, collaborating with Tech Leads, Product Owners, and stakeholders on technical decisions.

Software Engineer

Netra Tecnologia, Salvador, Brazil — Remote Sep 2023 – Jun 2026

- Built applications with PHP/Laravel and Vue.js, using PostgreSQL and designing RESTful APIs and microservice-based solutions.
- Optimized SQL queries and implemented caching strategies, reducing average API response time by 45%.
- Optimized GNU/Linux infrastructure with Docker and Kubernetes, reducing computing resource consumption by 20%.
- Led the implementation of CI/CD pipelines with GitLab CI and SonarQube, automating Docker-based deployments and reducing average deployment time by 80%.
- Migrated and normalized institutional databases, improving data integrity, scalability, and query efficiency.

Software Engineer
PRODEB — Bahia State Data Processing Company, Salvador, Brazil — Hybrid Feb 2022 – Sep 2023

- Developed RESTful APIs and features with Laravel and Vue.js, integrating PostgreSQL and Redis and using caching to optimize backend performance.
- Built and maintained GitLab CI pipelines, supporting deployments in GNU/Linux environments with Docker and Kubernetes.
- Contributed to the microservices architecture, reducing coupling and supporting system scalability.

Junior Software Engineer
Ramiro Campelo Group (Lojas Guaibim, Casa Mais Fácil), Salvador, Brazil — On-site Nov 2021 – Feb 2022

- Developed e-commerce platform integrations and reduced order API integration failures by 25% through improvements to the purchasing system.
- Created reports using Report Builder to support business decision-making.

Software Engineering Intern
TRT5 — 5th Regional Labor Court, Salvador, Brazil — Remote Aug 2020 – Nov 2021

- Responded to more than 50 security incidents and performed penetration testing, contributing to a 30% reduction in vulnerabilities.
- Integrated OpenVAS and Zabbix using Python, improving asset monitoring by 50%.

EDUCATION

Postgraduate Studies in Software Architecture
UNOPAR — University of Northern Paraná Mar 2024 – Mar 2025
Postgraduate Studies in Solutions Architecture
UNOPAR — University of Northern Paraná Jan 2024 – Jan 2025
Postgraduate Studies in Software Engineering
UNOPAR — University of Northern Paraná Jan 2023 – Jan 2024
Technology Degree in Systems Analysis and Development
UNIFACS — Salvador University Aug 2019 – Dec 2022

COURSES AND CERTIFICATIONS

Solution-Driven PHP Architect Mar 2026
Datadog Foundation — Datadog Apr 2025
Scrum Fundamentals Certified — SCRUMstudy Nov 2024
Clean Architecture and Clean Code Course — branas.io Apr 2024

LANGUAGES

Portuguese: Native
English: Professional working proficiency
